

## 2.3. PANDEMERIC\* - Projekt für Unternehmen der Euregio-Maas-Rhein

### **Input for newsletters and social partners Euregiochambers (EN)**

#### **Are you a manufacturer of (materials for) personal protective equipment? Or do you supply personal protective equipment?**

As part of the Interreg PANDEMERIC\* project, we are calling on companies in the Euregio Meuse-Rhine that can play a role in the production of personal protective equipment in the event of a pandemic or large-scale outbreak of an infectious disease.

During the first Covid wave, we were mainly dependent on countries outside the Euregio Meuse-Rhine for the supply of materials for personal protective equipment. In some cases, the quality of these materials was questionable. The PANDEMERIC project is therefore setting up a "euregional procurement and production chain" through the "Digital Innovation Platform". This platform offers business owners the opportunity to connect with each other quickly and in a targeted manner through a "matchmaking" function. Requests can be placed online and in addition, there is a separate page to present your company. In short, the platform offers many advantages. Register via [Kim Kessels](#) and contribute to a euregional approach to pandemics.

\* PANDEMERIC is an amalgamation of the words pandemic and EMRIC. PANDEMERIC supports EMRIC in its work during the COVID crisis.

As part of the Interreg PANDEMERIC\* project, we are calling on companies in the Euregio Meuse-Rhine that can play a role in the production of personal protective equipment in the event of a new pandemic or large-scale outbreak of an infectious disease. Euregional cooperation offers advantages in many areas. By registering, you can make use of the "Digital Innovation Platform", where you can also quickly and effectively connect to partners in the Euregio Meuse-Rhine.
